

# LSA100-100

## Cabin PA Amplifier

An easily-configured solution for small commuter aircraft and helicopter transport applications.

### Highlights

- **Integrates** with the cockpit audio system, cabin briefer, in-flight entertainment system, and existing cabin systems
- **Configure** cabin zones with six 20W outputs, each isolated and protected, featuring on/off control and status
- **Programmable** tones and chimes make the LSA100-100 a versatile solution

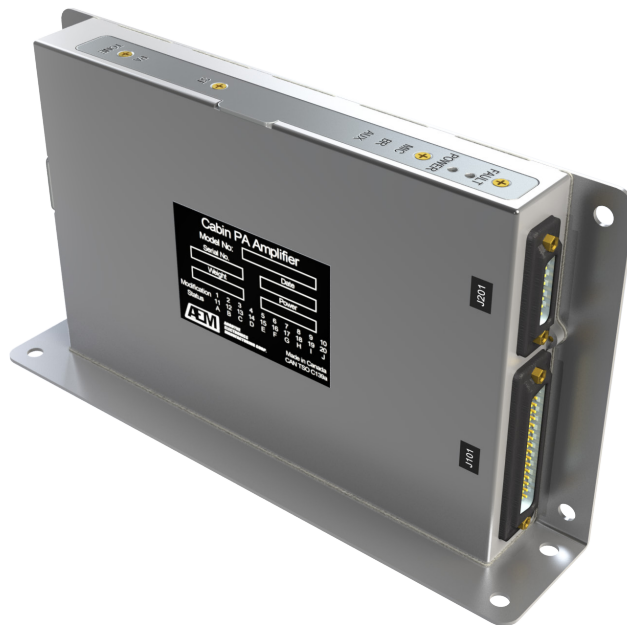

## LSA100-100 Features

AEM's LSA100-100 cabin PA amplifier is a small, lightweight solution to your cabin communication needs.

Developed for the corporate aircraft market, the cabin PA amplifier is also suitable for small commuter aircraft, and helicopter transport applications such as those supporting the off-shore oil and gas markets.

- Easy to configure and install
- Designed for new and retro-fit applications
- Integrates with cockpit audio system, cabin briefer, in-flight entertainment, and existing cabin speakers
- Low-noise and high efficiency Class D outputs
- Qualified to DO-160G and DO-214A
- Certified to CAN-TSO-C139a
